## Important Notices

**Nature of this document:** The purpose of this presentation is to provide general information about Coda Minerals Limited (ACN 625 763 957) (the 'Company'). Unless otherwise stated herein, the information in this presentation is based on the Company's own information and estimates as at the date of this presentation. In attending this presentation or viewing this document you agree to be bound by the following terms and conditions.

**Not an offer or advertisement:** This presentation is for information purposes and does not constitute or form any part of any offer or invitation to sell or issue, or any solicitation of any offer to purchase or subscribe for, any securities in the Company in any jurisdiction. This presentation and its contents must not be distributed, transmitted or viewed by a person in any jurisdiction where the distribution, transmission or viewing of this document would be unlawful under the securities or other laws of that or any jurisdiction. In particular, this presentation may not be distributed or released, directly or indirectly, in the United States. This presentation does not constitute an advertisement for an offer or proposed offer of shares. Neither this presentation nor anything contained in it forms the basis of any contract or commitment and it is not intended to induce or solicit any person to enter into, or refrain from entering into, any contract or commitment.

**Not financial product advice:** This presentation does not take into account the individual investment objectives, financial situation and particular needs of each of the Company's shareholders or potential investors. You may wish to seek independent financial and taxation advice before making any decisions in respect to this presentation. Neither the Company nor any of its related bodies corporate is licensed to provide financial advice in respect of the Company's securities or any other financial products.

**Forward-looking statements:** Certain statements in the presentation are or may be perceived as "forward looking statements" and represent the Company's intentions, projections, expectations or beliefs concerning, among other things, future operating and exploration results or the Company's future performance. You are cautioned not to place undue reliance on any forward looking statement. These forward looking statements are based on current expectations at the date of this publication. The projections, estimates and beliefs contained in such forward looking statements necessarily involve known and unknown risks and uncertainties, and are necessarily based on assumptions, which may cause the Company's actual performance and results in future periods to differ materially from any express or implied estimates or projections.

**Disclaimer:** No representation or warrant, express or implied, is made by the Company that the material contained in this presentation will be achieved or prove to be correct. Except for statutory liability which cannot be excluded, each of the Company, its directors, officers, employees, advisers, agents and contractors expressly disclaims any responsibility for the accuracy, fairness, sufficiency or completeness of the material contained in this presentation, or any opinions or beliefs contained in this presentation, and excludes all liability whatsoever (including negligence) for any loss or damage which may be suffered by any persons as a consequence of any information in this presentation or any error or omission there from. The Company is under no obligation to update or keep current the information contained in this presentation or to correct any inaccuracy or omission which may become apparent, or to furnish any person with any further information. Any opinions expressed in the presentation are subject to change without notice.

**Unverified information:** This presentation may contain information (including information derived from publicly available sources) that has not been independently verified by the Company.

## EXCEPTIONAL COPPER EXPOSURE

- 1.1Mt of JORC defined CuEq
- Planned 25ktpa copper cathode & 1ktpa cobalt sulphate production

## TIER 1 LOCATION – SOUTH AUSTRALIA

- Standout ESG credentials
- Simple approvals process

## STRONG FOUNDATIONAL ASSET

- Study demonstrates robust economics
- NPV<sub>g</sub>(Pre-Tax): \$570M, IRR: 27%

## TRANSFORMATIONAL IOCG (Cu-Au) EXPLORATION

- Multiple intercepts >3% Cu within 2.5km envelope
- New IOCG target identified, Maggie IOCG

## UNTAPPED EXPLORATION POTENTIAL

- Massive near resource Cu-Co extension potential
- Multiple Cu-Au targets from recent geophysics

# RESOURCES & MINING

## EMMIE BLUFF

### UNDERGROUND MINING, PHASE 2

#### Resource

43.3 Mt @ 1.30% Cu, 0.05% Co (1.84% CuEq)\*

#### Production Target

26.2Mt @ 1.42% Cu, 0.04% Co (1.86% CuEq)

## WINDABOUT

### OPEN PIT MINING, PHASE 2

#### Resource (100% Indicated)

17.67 Mt @ 0.77% Cu, 0.05% Co (1.41% CuEq)

#### Production Target

5.96Mt @ 1.03% Cu, 0.07% Co (1.71% CuEq)

## MG14

### OPEN PIT MINING, PHASE 1

#### Resource (100% Indicated)

1.83 Mt @ 1.24% Cu, 0.03% Co (1.67% CuEq)

#### Production Target

1.26Mt @ 1.42% Cu, 0.04% Co (1.87% CuEq)

\*Of which 38.8 Mt @ 1.90 CuEq is Indicated, 4.5 Mt @ 1.40% CuEq is Inferred

# IOCG DRILL SUCCESS

Breakthrough drillhole in June 2021

## KNOWN IRON OXIDE COPPER GOLD (IOCG)

- Gawler Craton - IOCG elephant country
- Emmie IOCG – Known since time of Olympic Dam discovery

## DRILL SUCCESS

- First drillhole into Emmie IOCG:
  - EB18, aggregate 35m @ >1% Cu from 797m<sup>1</sup>
- Early drilling success led to more drilling and more success;

BEST DRILL RESULTS <sup>1</sup>		Depth (m)	Results	
			Interval (m)	Grade
EBD3W2		803m	27m @	2.0% Cu, 0.29 g/t Au
		912m	42m @	1.2% Cu, 0.28 g/t Au
EB18W2		815m	24m @	2.2% Cu, 0.29 g/t Au
		902m	13m @	3.5% Cu, 0.64 g/t Au

- Major geophysical survey and review commenced in 2023, IOCG target areas identified, 2.5km long, 75% of which is undrilled.

### Olympic Dam

OC Sulphide<sup>3</sup>: 9.6Bt @ 0.57% Cu, 0.19kg/t U<sub>3</sub>O<sub>8</sub>  
 UG Sulphide<sup>3</sup>: 1.7Bt @ 1.48% Cu, 0.44kg/t U<sub>3</sub>O<sub>8</sub>

### Oak Dam West

AD-23<sup>2</sup>: 425.7m @ 3.04% Cu, 0.59g/t Au

### Carrapateena

900Mt @ 0.56% Cu, 0.24g/t Au, 2.6g/t Ag<sup>2</sup>

<sup>1</sup>Thicknesses and Cu grades have been rounded to the closest meter and 0.1% for simplicity. Please see ASX releases on [28 July 2021](#), [23 August 2021](#), [6 & 22 December 2021](#), [28 February 2022](#) and [20 June 2022](#) for full details of all mineralised holes and Table 1

### Cautionary Statement

The Scoping Study referred to in this presentation was released to ASX on [23 March 2023](#) undertaken for the purpose of initial evaluation of the potential for development of a series of open pit and underground mines and a mineral processing facility at the Elizabeth Creek Copper-Cobalt Project (The “Elizabeth Creek Project” or “Elizabeth Creek”). It is a preliminary technical and economic study of the potential viability of the Elizabeth Creek Project. It is based on low level technical and economic assessments that are not sufficient to support the estimation of ore reserves. Further exploration and evaluation work and appropriate studies are required before Coda will be in a position to estimate any ore reserves or to provide any assurance of an economic development case. The Study is based on the material assumptions outlined below. These include assumptions about the availability of funding. While Coda considers all of the material assumptions to be based on reasonable grounds, there is no certainty that they will prove to be correct or that the range of outcomes indicated by the Study will be achieved.

The Scoping Study outcomes, production target and forecast financial information referred to in the release are based on low level technical and economic assessments that are insufficient to support estimation of Ore Reserves. The Company has concluded that it has reasonable grounds for disclosing a production target which includes an amount of Inferred Mineral Resources. There is a low level of geological confidence associated with Inferred Mineral Resources and there is no certainty that further exploration work will result in the determination of Indicated Mineral Resources or that the production target itself will be realised. Inferred Mineral Resources comprise only approximately 0.15%, 0.66% and 4.83% of the contained metal (copper equivalent) in the first three years, five years and the project’s entire operating life respectively. Inferred Mineral Resources comprise approximately 0.19%, 0.67% and 6.31% of production on a tonnage basis in the first three years, five years and the project’s entire operating life respectively. The viability of the development scenario envisaged in the Scoping Study does not depend on the inclusion of Inferred Mineral Resources.

To achieve the range of outcomes indicated in the Scoping Study, funding of in the order of \$440 million will likely be required. Investors should note that there is no certainty that the Company will be able to raise that amount of funding when needed. It is also possible that such funding may only be available on terms that may be dilutive to or otherwise affect the value of Coda Minerals’ existing shares. It is also possible that Coda could pursue other ‘value realisation’ strategies such as a sale, partial sale or joint venture of the project. If it does, this could materially reduce the Company’s proportionate ownership of the project. Given the uncertainties involved, investors should not make any investment decisions based solely on the results of the Scoping Study.

The Mineral Resources underpinning the production target in the Study have been prepared by a Competent Person in accordance with the requirements of Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves (**JORC Code (2012)**). The Competent Person’s Statements are found in the Geology and Resources section of the Study. For full details of the Mineral Resource Estimates for the Emmie Bluff Resource, including JORC Table 1, please refer to “ASX Release – Standout 43Mt Maiden Cu-Co Resource at Emmie Bluff”, released to the ASX on 20 December 2021 and available at [https://www.codaminerals.com/wp-content/uploads/2021/12/20211220\\_Coda\\_ASX-ANN\\_Standout-43Mt-Maiden-Cu-Co-Resource-at-Emmie-Bluff\\_RELEASE.pdf](https://www.codaminerals.com/wp-content/uploads/2021/12/20211220_Coda_ASX-ANN_Standout-43Mt-Maiden-Cu-Co-Resource-at-Emmie-Bluff_RELEASE.pdf). For full details of the Mineral Resource Estimates for the MG14 and Windabout Resources, including JORC Table 1, please refer to “Securities Exchange Announcement – Mt Gunson Copper-Cobalt Project Update”, released to the ASX on 19 January 2018 and available at <https://www.asx.com.au/asxpdf/20180119/pdf/43a9a9d120260.pdf>. Coda confirms that it is not aware of any new information or data that materially affects the information included in those releases. All material assumptions and technical parameters underpinning the estimates in those announcements continue to apply and have not materially changed.

This announcement contains forward-looking statements. Coda Minerals has concluded that it has a reasonable basis for providing these forward-looking statements and believes it has a reasonable basis to expect it will be able to fund development of the Elizabeth Creek Project. However, several factors could cause actual results or expectations to differ materially from the results expressed or implied in the forward-looking statements. Given the uncertainties involved, investors should not make any investment decisions based solely of the results of this study.

The Study has been completed to a level of accuracy of +/-35% in line with industry standard accuracy for this stage of development. All dollar figures are presented in Australian dollars (AUD) except where specifically otherwise indicated.

### Metal Equivalents

Metal Equivalent grades are quoted for one or more of the Emmie Bluff, Windabout and MG14 Mineral Resources, or for exploration results considered by the Company to be related directly to one of these Mineral Resources, in this announcement.

#### For the Emmie Bluff Mineral Resource:

The Emmie Bluff Mineral Resource is reported as 43Mt @ 1.3% Cu, 470 ppm Co, 11 g/t Ag and 0.15% Zn (1.84% Copper Equivalent (CuEq)) reported at a cut-off grade of 1% CuEq. The calculation of this metal equivalent is based on the assumptions in the table above.

Price assumptions used when calculating copper equivalent grades were based primarily on Consensus Economics forecasts of metals, except for Cobalt, which was sourced via communication with subject matter experts. Metallurgical assumptions used when calculating copper equivalent grades were based on a simple bulk float utilising rougher and minimal cleaner/scavenger circuits. The produced a reasonably consistent mean recovery across most metals of between approximately 83 and 94 percent. For simplicity, and to in part account for losses associated with less intensive cleaner floats and losses to the hydromet plant, these figures were rounded down to the nearest 5%.

Application of these assumptions resulted in the following calculation of CuEq:  $CuEq\% = Cu\% + 0.00068 \times Co\ ppm + 0.337 \times Zn\ \% + 90.3 \times (Ag\ ppm/10000)$

#### For the Windabout and MG14 Mineral Resource:

The Windabout and MG14 Mineral Resource are reported at a cut-off grade of 0.5% CuEq as:

- **Windabout:** 17.67Mt @ 0.77% Cu, 492 ppm Co and 8 g/t Ag (1.41% CuEq)
- **MG14:** 1.83Mt @ 1.24% Cu, 334 ppm Co and 14 g/t Ag (1.84% CuEq)

The calculation of this metal equivalent is based on the assumptions in the table to the right.

Price assumptions used when calculating copper equivalent grades were based on recent historical metal prices at the time of calculation (2018). Metallurgical assumptions are based on extensive metallurgical testwork undertaken on the two deposits to 2018 across various potential flowsheets involving both floatation and leaching. Ag analyses in the estimation and metallurgical testwork were considered insufficient at the time to include in the metal equivalent calculation.

Application of these assumptions resulted in the following calculation of CuEq:  $CuEq\% = Cu\% + 0.0012 \times Co\ ppm$

It is the opinion of the Company that both sets of prices used in the calculations are reasonable to conservative long-term forecasts for real dollar metal prices during the years most relevant to the deposits (approx. 2026-2030).

It is the opinion of the Company that all of the elements included in the metal equivalent calculations have a reasonable potential to be recovered and sold.

For full details of the Emmie Bluff Metal Equivalent calculation, please see “Standout 43Mt Maiden Cu-Co Resource at Emmie Bluff”, released to the ASX on 20<sup>th</sup> December 2021 and available at [https://www.codaminerals.com/wp-content/uploads/2021/12/20211220\\_Coda\\_ASX-ANN\\_Standout-43Mt-Maiden-Cu-Co-Resource-at-Emmie-Bluff\\_RELEASE.pdf](https://www.codaminerals.com/wp-content/uploads/2021/12/20211220_Coda_ASX-ANN_Standout-43Mt-Maiden-Cu-Co-Resource-at-Emmie-Bluff_RELEASE.pdf). For full details of the MG14/Windabout Metal Equivalent Calculation, please see “Confirmation of Exploration Target & Mineral Resource and Ore Reserve Statement”, released to the ASX on 23<sup>rd</sup> October 2020 and available at [https://www.codaminerals.com/wp-content/uploads/2020/10/20201028\\_Coda\\_ASX-ANN\\_Confirmation-Statements-JORC.pdf](https://www.codaminerals.com/wp-content/uploads/2020/10/20201028_Coda_ASX-ANN_Confirmation-Statements-JORC.pdf).

Metal	Coefficient	Forecast Price	Price Unit

# APPENDIX A: STATEMENTS

## Mineral Resources & Competent Person Statement

### Mineral Resources and Exploration Targets

- MG14 Indicated Mineral Resource:** The information is extracted from the report entitled "Mt Gunson Copper-Cobalt Project Update" created on 19 January 2018 and is available to view on <https://www.asx.com.au/asxpdf/20180119/pdf/43qxphjd18l2x0.pdf>. The company confirms that it is not aware of any new information or data that materially affects the information included in the original market announcement and, in the case of estimates of Mineral Resources or Ore Reserves, that all material assumptions and technical parameters underpinning the estimates in the relevant market announcement continue to apply and have not materially changed. The company confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the original market announcement.
- Windabout Indicated Mineral Resource:** The information is extracted from the report entitled "Mt Gunson Copper-Cobalt Project Update" created on 19 January 2018 and is available to view on <https://www.asx.com.au/asxpdf/20180119/pdf/43qxphjd18l2x0.pdf>. The company confirms that it is not aware of any new information or data that materially affects the information included in the original market announcement and, in the case of estimates of Mineral Resources or Ore Reserves, that all material assumptions and technical parameters underpinning the estimates in the relevant market announcement continue to apply and have not materially changed. The company confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the original market announcement.
- Emmie Bluff Mineral Resource:** The information is extracted from the report entitled "Standout 43Mt Maiden Cu-Co Resource at Emmie Bluff" created on 20 December 2021 and is available to view on [https://cdn-api.markitdigital.com/apiman-gateway/ASX/asx-research/1.0/file/2924-02469004-6A1069433?access\\_token=83ff96335c2d45a094df02a206a39ff4](https://cdn-api.markitdigital.com/apiman-gateway/ASX/asx-research/1.0/file/2924-02469004-6A1069433?access_token=83ff96335c2d45a094df02a206a39ff4). The company confirms that it is not aware of any new information or data that materially affects the information included in the original market announcement and, in the case of estimates of Mineral Resources or Ore Reserves, that all material assumptions and technical parameters underpinning the estimates in the relevant market announcement continue to apply and have not materially changed. The company confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the original market announcement.

### Competent Person Statement for JORC 2012 Mineral Resources

This report was prepared in accordance with the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves' ("JORC Code") by Tim Callaghan, who is a Member of the Australian Institute of Mining and Metallurgy ("AusIMM"), has a minimum of five years' experience in the estimation and assessment and evaluation of Mineral Resources of this style and is the competent Person as defined in the JORC Code. This announcement accurately summarises and fairly reports his estimations and he has consented to the resource report in the form and context it appears.

The MG14 and Windabout Mineral Resource at the Mount Gunson Copper-Cobalt Project has been estimated by Mr Tim Callaghan, an external consultant, and is reported under the 2012 Edition of the Australasian Code for reporting of Exploration Results, Mineral Resources and Ore Reserves (see Gindalbie Metals ASX announcement 19 January 2018 titled: Mt Gunson Copper-Cobalt Project Update).

### Competent Person Statement for JORC 2012 Mineral Resources – Emmie Bluff

The information in this statement that relates to the Mineral Resource Estimates is based on work done by Dr Michael Cunningham of Sonny Consulting Services Pty Ltd. The information in this report which relates to exploration results is based on information compiled by Mr. Matthew Weber, who is an employee of the company.

Dr Cunningham and Mr Weber are Members of the Australasian Institute of Mining and Metallurgy and have sufficient relevant experience to the style of mineralisation and type of deposit under consideration and to the activities undertaken to qualify as a Competent Person as defined in the 2012 Edition of the Joint Ore Reserves Committee (JORC) Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves.

The Competent Persons consent to the inclusion in this report of the matters based on the information compiled by them, in the form and context in which it appears.

# APPENDIX B: METAL EQUIVALENT CALCULATIONS

## Statement Regarding Metal Equivalent Calculations

Metal Equivalent grades are quoted for one or more of the Emmie Bluff, Windabout and MG14 Mineral Resources, or for exploration results considered by the company to be related directly to one of these Mineral Resources, in this announcement.

### ***For the Emmie Bluff Mineral Resource:***

The Emmie Bluff Mineral Resource is reported as 43Mt @ 1.3% Cu, 470 ppm Co, 11 g/t Ag and 0.15% Zn (1.84% Copper Equivalent (CuEq)) reported at a cut-off grade of 1% CuEq. The calculation of this metal equivalent is based on the following assumptions.

Metal	Coefficient	Forecast Price	Price Unit
Copper	0.8	\$7,000	USD/Tonne
Cobalt	0.85	\$55,000	USD/Tonne
Zinc	0.9	\$2,100	USD/Tonne
Silver	0.85	\$18.50	USD/Oz

Price assumptions used when calculating copper equivalent grades were based primarily on Consensus Economics forecasts of metals, except for Cobalt, which was sourced via communication with subject matter experts. Metallurgical assumptions used when calculating copper equivalent grades were based on a simple bulk float utilising rougher and minimal cleaner/scavenger circuits. The produced a reasonably consistent mean recovery across most metals of between approximately 83 and 94 percent. For simplicity, and to in part account for losses associated with less intensive cleaner floats and losses to the hydromet plant, these figures were rounded down to the nearest 5%.

Application of these assumptions resulted in the following calculation of CuEq:

$$CuEq\% = Cu\% + 0.00068 \times Co\ ppm + 0.337 \times Zn\ \% + 90.3 \times \frac{Ag\ ppm}{10000}$$

### ***For the Windabout and MG14 Mineral Resource:***

The Windabout and MG14 Mineral Resource are reported at a cut-off grade of 0.5% CuEq as:

- **Windabout:** 17.67Mt @ 0.77% Cu, 492 ppm Co and 8 g/t Ag (1.41% CuEq)
- **MG14:** 1.83Mt @ 1.24% Cu, 334 ppm Co and 14 g/t Ag (1.84% CuEq)

# APPENDIX B: METAL EQUIVALENT CALCULATIONS

## Statement Regarding Metal Equivalent Calculations (continued)

The calculation of this metal equivalent is based on the following assumptions:

Metal	Mining Recovery %	Dilution %	Recovery %	Payability %	Forecast Price	Price Unit
Copper	0.9	0.05	0.6	0.7	\$6,600	USD/Tonne
Cobalt	0.9	0.05	0.85	0.75	\$55,000	USD/Tonne

Price assumptions used when calculating copper equivalent grades were based on recent historical metal prices at the time of calculation (2018). Metallurgical assumptions are based on extensive metallurgical testwork undertaken on the two deposits to 2018 across various potential flowsheets involving both floatation and leaching. Ag analyses in the estimation and metallurgical testwork were considered insufficient at the time to include in the metal equivalent calculation.

Application of these assumptions resulted in the following calculation of CuEq:

$$CuEq\% = Cu\% + 0.0012 \times Co\ ppm$$

It is the opinion of the company that both sets of prices used in the calculations are reasonable to conservative long-term forecasts for real dollar metal prices during the years most relevant to the deposits (approx. 2026-2030).

It is the opinion of the company that all of the elements included in the metal equivalent calculations have a reasonable potential to be recovered and sold.

For full details of the Emmie Bluff Metal Equivalent calculation, please see “Standout 43Mt Maiden Cu-Co Resource at Emmie Bluff”, released to the ASX on 20<sup>th</sup> December 2021 and available at [https://www.codaminerals.com/wp-content/uploads/2021/12/20211220\\_Coda\\_ASX-ANN\\_Standout-43Mt-Maiden-Cu-Co-Resource-at-Emmie-Bluff\\_RELEASE.pdf](https://www.codaminerals.com/wp-content/uploads/2021/12/20211220_Coda_ASX-ANN_Standout-43Mt-Maiden-Cu-Co-Resource-at-Emmie-Bluff_RELEASE.pdf). For full details of the MG14/Windabout Metal Equivalent Calculation, please see “Confirmation of Exploration Target & Mineral Resource and Ore Reserve Statement”, released to the ASX on 23<sup>rd</sup> October 2020 and available at [https://www.codaminerals.com/wp-content/uploads/2020/10/20201026\\_Coda\\_ASX-ANN\\_Confirmation-Statements-JORC.pdf](https://www.codaminerals.com/wp-content/uploads/2020/10/20201026_Coda_ASX-ANN_Confirmation-Statements-JORC.pdf).

# APPENDIX C: STATEMENTS & REFERENCES

---

## Production Targets

The information in relation to production targets included in this presentation specifically on slide 8 is taken from the Scoping Study published on [23 March 2023](#).

The company confirms that it is not aware of any new information or data that materially affects the information included in the original market announcement and, in the case of the quoted production targets, that all material assumptions and technical parameters underpinning the estimates in the relevant market announcement continue to apply and have not materially changed. The company confirms that the form and context have not been materially modified from the original market announcement.

## References – Geological Images

The information in relation to images included in this presentation on slides 13 is taken from the announcement “New Copper-Cobalt Drill Targets Defined at Emmie Bluff” published on [4 July 2023](#). The company confirms that it is not aware of any new information or data that materially affects the information included in the original market announcement.

The information in relation to images included in this presentation on slides 14 & 16 is taken from the announcement “MT Survey Commences Targeting Emmie Bluff Extensions” published on [25 July 2023](#). The company confirms that it is not aware of any new information or data that materially affects the information included in the original market announcement.

## References – Scoping Study

References to the Scoping Study relate to the Elizabeth Creek Scoping Study published on [23 March 2023](#) please note disclaimers on slide 3 of this presentation and full details of the Study available on the ASX platform and Coda’s website. The company confirms that it is not aware of any new information or data that materially affects the information included in the original market announcement.
